▲ Network dependency tree

^

Avoid chaining critical requests by reducing the length of chains, reducing the download size of resources, or deferring the download of unnecessary resources to improve page load. LCP Unscored

Maximum critical path latency: 213 ms

Initial Navigation

Preconnected origins

[preconnect](#) hints help the browser establish a connection earlier in the page load, saving time when the first request for that origin is made. The following are the origins that the page preconnected to.

no origins were preconnected

No additional origins are good candidates for preconnecting

Render-blocking requests

Requests are blocking the page's initial render, which may delay LCP. [Deferring or inlining](#) can move these network requests out of the critical path. LCP FCP Unscored

URL	Transfer Size	Duration
srilexbuditra.work 1st Party	10.6 KiB	0 ms
/style.css (srilexbuditra.work)	10.6 KiB	

Optimize DOM size

LCP breakdown

These insights are also available in the Chrome DevTools Performance Panel - [record a trace](#) to view more detailed information.

DIAGNOSTICS

Avoid non-composited animations — 1 animated element found

More information about the performance of your application. These numbers don't [directly affect](#) the Performance score.

PASSED AUDITS (20)

Show

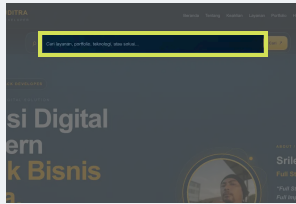

[web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

ARIA

▲ [aria-*] attributes do not match their roles

Each ARIA role supports a specific subset of aria-* attributes. Mismatching these invalidates the aria-* attributes. [Learn how to match ARIA attributes to their roles.](#)

Failing Elements

Cari di website

```
<input id="siteSearchInput" name="q" type="search" placeholder="Cari layanan, portfolio, teknologi, atau solusi..." aria-label="Cari di website" aria-autocomplete="list" aria-controls="siteSearchPanel" aria-expanded="false">
```

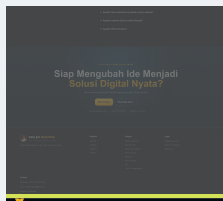

These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

CONTRAST

▲ Background and foreground colors do not have a sufficient contrast ratio.

Low-contrast text is difficult or impossible for many users to read. [Learn how to provide sufficient color contrast.](#)

Best Practices

GENERAL

▲ Browser errors were logged to the console

Errors logged to the console indicate unresolved problems. They can come from network request failures and other browser concerns. [Learn more about this errors in console diagnostic audit](#)

Source	Description
srilexbuditra.work 1st Party	
/tts.js:84:16 (srilexbuditra.work)	Applying inline style violates the following Content Security Policy directive 'default-src 'self''. Either the 'unsafe-inline' keyword, a hash ('sha256-SYj563YXypdgJhRc3IAKf7qXs/cBEr5icWS70Q8ZSNQ='), or a nonce ('nonce-...') is required to enable inline execution. Note also that 'style-src' was not explicitly set, so 'default-src' is used as a fallback. The action has been blocked.
https://srilexbuditra.work:1:0	Loading the script 'https://static.cloudflareinsights.com/beacon.min.js/v3d52b47920f24c319d37e2661827c42b1787588026925' violates the following Content Security Policy directive: "default-src 'self'". Note that 'script-src-elem' was not explicitly set, so 'default-src' is used as a fallback. The action has been blocked.

▲ Issues were logged in the [Issues](#) panel in Chrome Devtools

Issues logged to the Issues panel in Chrome Devtools indicate unresolved problems. They can come from network request failures, insufficient security controls, and other browser concerns. Open up the Issues panel in Chrome DevTools for more details on each issue.

/beacon.min.js/v3d52b47... (static.cloudflareinsights.com)
