/search-enhancer.js (srilexbuditra.work)	- 183 ms, 3.30 KiB

Preconnected origins

[preconnect](#) hints help the browser establish a connection earlier in the page load, saving time when the first request for that origin is made. The following are the origins that the page preconnected to.

Preconnect candidates

Add [preconnect](#) hints to your most important origins, but try to use no more than 4.

No additional origins are good candidates for preconnecting

☐ Optimize DOM size

☐ LCP breakdown

PASSED AUDITS (20)

[Show](#)

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

ARIA

Each ARIA role supports a specific subset of aria-* attributes. Mismatching these invalidates the aria-* attributes. [Learn how to match ARIA attributes to their roles.](#)

Cari di website

```
<input id="siteSearchInput" name="q" type="search" placeholder="Cari layanan, portfolio, teknologi, atau solusi..." aria-label="Cari di website" aria-autocomplete="list" aria-controls="siteSearchPanel"
```

Failing Elements

These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

CONTRAST

▲ Background and foreground colors do not have a sufficient contrast ratio. ^

Low-contrast text is difficult or impossible for many users to read. [Learn how to provide sufficient color contrast.](#)

Failing Elements

These are opportunities to improve the legibility of your content.

NAVIGATION

▲ Heading elements are not in a sequentially-descending order ^

Properly ordered headings that do not skip levels convey the semantic structure of the page, making it easier to navigate and understand when using assistive technologies. [Learn more about heading order.](#)

Failing Elements

These are opportunities to improve keyboard navigation in your application.

BEST PRACTICES

- ☐ Identical links have the same purpose.
- ▼

These items highlight common accessibility best practices.

GENERAL

Errors logged to the console indicate unresolved problems. They can come from network request failures and other browser concerns. [Learn more about this errors in console diagnostic audit](#)

srilexbuditra.work 1st Party	
/tts.js:84:16 (srilexbuditra.work)	Applying inline style violates the following Content Security Policy directive 'default-src 'self''. Either the 'unsafe-inline' keyword, a hash ('sha256-SYj563YXypdgJhRc3IAKf7qXs/cBEr5icWS70Q8ZSNQ='), or a nonce ('nonce-...') is required to enable inline execution. Note also that 'style-src' was not explicitly set, so 'default-src' is used as a fallback. The action has been blocked.
Source	Description
0	Loading the script Security Policy directive: "default-src 'self'". Note that 'script-src-elem' was not explicitly set, so 'default-src' is used as a fallback. The action has been blocked.

 Issues were logged in the [Issues](#) panel in Chrome Devtools

^

Issues logged to the Issues panel in Chrome Devtools indicate unresolved problems. They can come from network request failures, insufficient security controls, and other browser concerns. Open up the Issues panel in Chrome DevTools for more details on each issue.
